ARIA

TECHNICAL SPECIFICATIONS PRODUCT PROFILE

Aria is a modern creation for SUNBLOCK range, it combines the delicate style of CLASSIC and the durability of QUEEN series. Along with the internal Led lighting in its beams, Aria has a dominant role in the atmospheric decoration of the outdoor space.

With the semi-automatic mechanism (latch) that has been specially designed by SUNBLOCK, it only takes a small push of the handle, and your umbrella is open and ready to use.

QUEEN's compact size and superior quality, with unique SUNBLOCK moldings with aluminum profiles, plastic fasteners and lighting profiles, combined with its resistance to weather conditions, time and winds of up to force 7 in the Beaufort scale, make it ideal for professional applications.

It is fully customizable, based on your preferred size and frame color, and you can also select from a variety of technical, shading fabrics by international manufacturers, and a full set of accessories, so that your umbrella matches the style and needs of the intended application.
